The Ryno® range

Ryno products are made to the highest standards and designed to withstand the harshest treatment, representing true value for money over their extended lifetime.

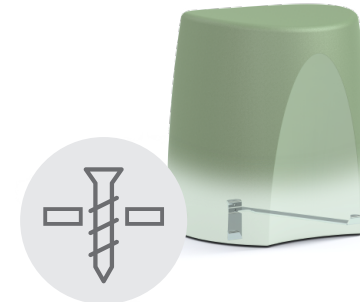

Damage-resistant

Their ultra-strong construction enables Ryno products to withstand extreme treatment. Smooth curves help to prevent stress points, distributing impact evenly throughout the product's outer shell.

Lifetime guarantee

All Ryno products are covered by a lifetime guarantee against manufacturing faults, providing additional peace of mind.

Floor/wall fixed options

Using our hidden fixing methods (patent pending), Ryno products can be secured to floors and/or walls, preventing weaponisation and reducing opportunities for damage or concealment.

Non-flammable

Our unique polymer is flame-retardant, compliant with UL94 HB and upholstered products are compliant with British Standard 5852:2006 ignition source 5.

Hygienic

Ryno products are anti-bacterial (even beneath the surface) thanks to our unique polymer blend. Their water-resistant nature means they can easily be wiped clean and dry quickly, ready to be used again.

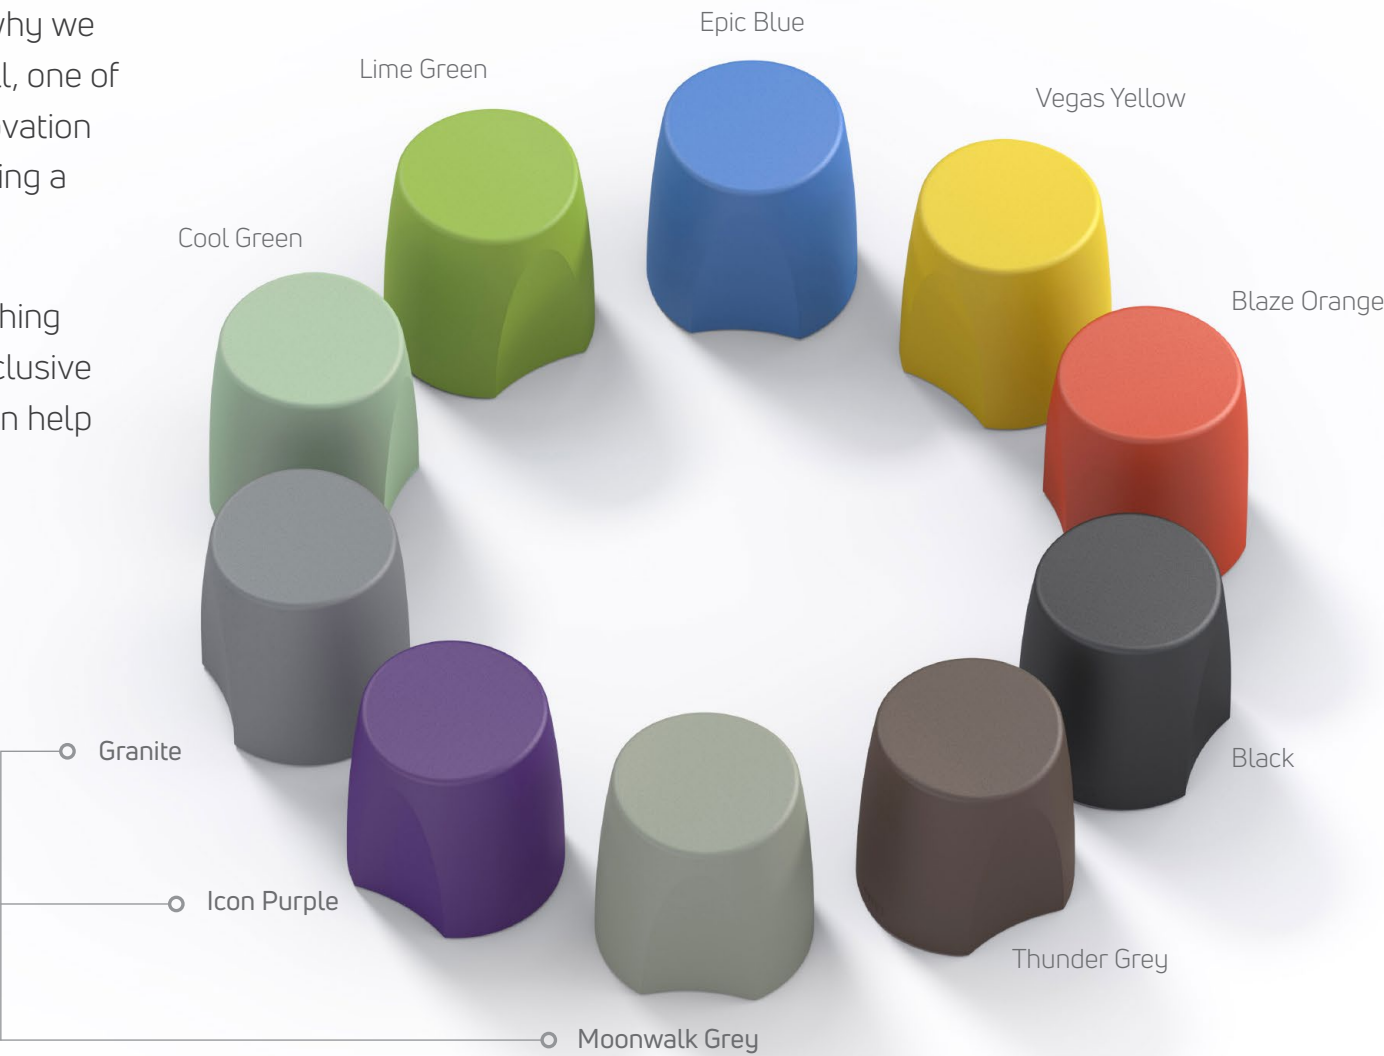

Multi-purpose Ryno wipes available to purchase

Colour

Colour can play a key role in establishing the character of a space, which is why we enlisted the help of Seymourpowell, one of the world’s leading design and innovation consultancies, to assist us in selecting a thoughtful range of colours.

Whether the aim is to create a soothing and reassuring space or provide inclusive stimulation, our versatile palette can help to achieve it.

Applies to bedroom items only (see pages 10-11)

Material

Ryno products are manufactured from a unique polyethylene compound specifically developed for high-risk applications. A combination of additives work together to create safe, durable and practical products suitable for both indoor and outdoor use.

Recyclable
Thanks to the recyclable nature of polyethylene, Ryno products can be milled back into polyethylene powder and re-moulded to create new products.

A UV-stabilising additive protects Ryno products against the damaging effects of the sun’s rays, limiting colour fading and brittleness when used for extended periods outdoors.

Ryno products are UL94 HB compliant due to the inherently flame-retardant properties of our polymer.

The addition of Silver Oxide inhibits bacterial growth, preserving high levels of hygiene and infection control. Unlike surface treatments which may wear away, this anti-bacterial protection runs throughout all Ryno products.

Weight: 50kg (standard)
25kg (midweight)
5kg (lightweight)

Design for wellbeing

Our Ryno® range has a proven track record in transforming high-risk spaces into safer, more human-centred environments by combining extraordinary resilience with organic styling and a therapeutic colour palette.

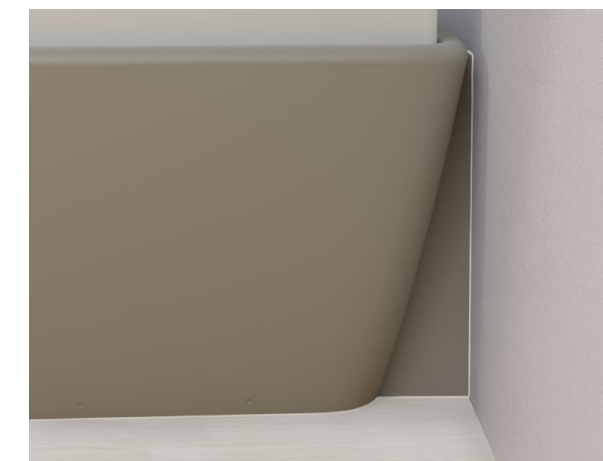

This new collection has been designed specifically for bedrooms - private spaces where continuous observation for safety and security can be particularly challenging.

A host of safety features have been built into the range to ensure safety for residents, staff and visitors alike. Through carefully considered design, ligature risks have been reduced, concealment opportunities prevented and instances of damage minimised.

Our products incorporate organic shapes and details which soften the built environment, encouraging harmony and promoting wellbeing for those who need it.

Integrated clothes storage solution minimises ligature risks

Optional infill panel minimises concealment opportunities when the bed is positioned against a wall

Organic curves and ripple details evoke a natural feel, helping to nurture recovery

Reduced ligature design features

Safely rounded corners

Tapered design
maximises floor space

735H | 698W | 507D (mm)
Weight: 24kg

Ryno® Club chair

KEY FEATURES & BENEFITS

- Sloping arms designed to minimise ligature risks
- Recessed footwell aides staff in safe de-escalation practices
- Durable polyethylene one-piece construction provides excellent strength and cannot be weaponised unlike a conventional chair
- Heavily weighted to 50kg as standard to deter misuse, with other weight options available
- Anti-microbial material provides protection throughout the product – not just on the surface
- UV stabilised and water-resistant – ideal for outdoor use (applies to non-upholstered items)
- Strength and stability tested for severe contract use (BS EN 16139:2013 level 2). Exceeded the 200,000 cycle pass mark by a further 300,000 cycles
- Compliant with UL94 HB flammability standards
